

Extended warranty package

Premium extended protection
for gearmotors

Extended warranty options for gearmotors

This premium protection package for new drives provides an additional 12-month warranty on top of the original factory warranty — which covers 12 months from the date of purchase. The premium protection option must be added at the time of purchase.

Benefits:

- Longer waiting times leading up to the drive's initial startup can be covered
- Minimize risk to OEMs/machine builders when machines are stored before installation
- OEMs can minimize risk to end users by offering the extended warranty
- Added warranty time for long-range projects like factory and plant start-up

The optional* PREMIUM protection package for gearmotors from SEW-EURODRIVE covers:

- **Premium Sine Seal**
Provides a wider contact surface, and reduced friction, heat, and wear. PSS has approximately half the thermal losses and double the life of a standard seal.
- **Premium FKM seal on the output shaft**
This copolymer-based seal offers excellent resistance to media, ozone, and aging. Protection against a wide temperature range gives added protection in most applications.
- **Premium gear oil**
GearOil by SEW-EURODRIVE — This proprietary lubricant blend reduces friction and increases performance in component parts like sealing rings and bearings.

* Option only available as extension to warranty period

Premium Sine oil seal

Premium FKM rubber oil seal

Premium lubricant
