

SERVICE FOCUS

INDUSTRIAL GEAR REPAIR

SERVICE

Repair for Large Industrial Gear Units

SEW-EURODRIVE offers complete repair of all large industrial gear units — even other brands. Our Service Centers and Certified Service Partners are conveniently located across the U.S. and are led by experienced professionals who handle your repairs from start to finish .

Global Standard Processes Ensure Quality

All service center technicians have been extensively trained for inspections and repairs

All SEW gear units are rebuilt to original factory specifications

All equipment used for repairs is inspected and calibrated on a regular basis

All repair projects start with SEW-EURODRIVE's comprehensive checklist:

- ✓ Take pictures of the gear unit as received
- ✓ Log gear unit into the system
- ✓ Visual inspection of the gear unit
- ✓ All hardware removed and documented
- ✓ Gear unit and parts washed
- ✓ Pictures taken of the housing, gears, shafts, bores
- ✓ Measurements taken of all journals and bores
- ✓ Gear teeth counted and ratio verified
- ✓ Magnetic particle inspection of all stress areas
- ✓ Condition of seals, bearings, and shims noted
- ✓ Engineer reviewed/approved report generated with pictures, notes, and recommendations
